 - Research studies
 - Behaviour study on reskilling and upskilling
- **Toolkit Development**
 - Standardized resources.
 - Tailored to industries.
 - Facilitates implementation and monitoring
- **Qualifications Framework Harmonization**
- **Cross-Border Expertise Exchange**
 - Facilitates sharing of best practices.
 - Promotes collaboration between countries.
 - Fosters mutual learning and growth.

COMMENTS FROM ONLINE PARTICIPANTS

- There should be a platform for each country will share updated the information of their national VET system including network of VET schools, VET qualifications... This facilitate understanding and learning from each other. This also helps students to find information for their learning opportunities in ASEAN countries and for government agencies for recognition of qualifications
- Each country should update about their big reforms in VET and lessons learnt, share lessons learnt and products from successful projects in VET (CBTA pilot, Sector Skills Council pilot, Green & Digital VET Schools Model, new qualifications to adapt to 4.0)
- Should organise technical workshops on sharing information and experienced on issues of shared interests for example RPL or sector skills councils

- **Hien Pham, from Aus4Skills Vietnam**

COMMENTS FROM ONLINE PARTICIPANTS

- The 3rd ASEAN TVET dialogue is recognized as pivotal in propelling the reskilling and upskilling agenda across the region. It underscored the significance of leveraging technology, fostering ongoing learning, fortifying partnerships, championing inclusivity, maintaining quality standards, and promoting collaboration among ASEAN member nations.
- Despite attending virtually, it was an enriching experience for me, marking my first participation in such an event of its kind. I am deeply grateful for the valuable learning and insights gained from this experience. - **PH_Dir. Dorie U. Gutierrez**
